## NEW LIMITED WARRANTY

All refrigerator sales dated April 1, 2014, and thereafter will be covered with a three-year warranty package—a complete coverage on all performance parts for three years and **an additional three-year warranty on the cooling unit when installed with adequate ventilation.** See your owner’s manual for details. The manufacturer reserves the right to repair or replace a faulty cooling unit. This warranty package will be standard on all “CRYSTAL COLD” refrigerators.

### Warranty Summary:

- Thermocouple and thermostat – three years.
- Cooling Unit – **six years with proper ventilation.**

A friendly reminder: When installing a refrigerator in a boxed-in setting, please install a floor register directly below the cooling unit for added ventilation from the crawl space or basement. This extra air movement will lower the cooling unit temperature and extend the life of the refrigerator. Also, write the date the refrigerator was installed on the back side of the unit.

From everyone at **CRYSTAL COLD LLC.**
