7th Character/Color

- W - White
- T - Biscuit
- B - Black
- O - White on White

Options may not be 'mixed and matched' and are confined to one of the many models offered.

The 24", 30" and 36" stainless models are available with differing backguards; see brochure for further detailed information. Stainless models are black porcelain on the sides and range-top of all models.

Electric spark ignition allows **all burners and oven** to be lit with a match in the event of a power failure, or when you do not desire the unit to be hooked up to AC power. There is no 'glow bar' or heating element in any of these ranges.

Quality features and benefits on all gas ranges:

All cook tops offer a porcelain finish top, which lasts longer and is easier to clean. The recessed design helps keep spills in place; the top burners offer a lifetime guarantee. The cook tops (with standard burners) lift off for ease of cleaning, are easy to remove and dishwasher safe.

The oven is full size and offers extra capacity; it's completely insulated, saving energy and makes for better baking. The lift-off oven door (except in 20" units) allows easy access for cleaning. The oven racks are nickel coated for durability; the oven door seals retain heat in the oven, and the removable oven bottom provides a recessed area to retain spills. The broiler offers a roll-out drop door for easy access, with a positive closed position, and the large pan and tray have an all-porcelain finish.

OPTIONS: Chrome heat reflector trays can be ordered separately when not included with the model number; oven and door are finished in regular porcelain.

Sealed burners...spills are retained on the cook top for easy clean up... ..all burners with simmer capacity allow for complete control with infinite settings. Universal valves on all models allow for easy conversion from Natural to LP gas without additional parts or special tools.

More porcelain enamel parts enhances the value and life of your range; is easiest to clean, and resists scratches and stains. The lift-off cook top allows access to the porcelain burner box and the individual removable top burners for easy cleaning.

Other standard features: lifetime guaranteed top burner elements; recessed porcelain lift up cooktop with support rod; up front controls; blade type burner knobs; permanent markings on control panel inlay; surface indicator light; oven indicator light on 30" units; oven limit switch; keep warm 150°F oven thermostat; closed door variable broil; color co-ordinated door handles; silicone oven door seals; fully insulated (blanket type); porcelain smokeless broiler pan & tray; (storage drawer on 36" stainless models); four leg levelers; and heavy duty rigid construction.

Pricing is as listed with the following options: for chrome reflector pans, add \$25 for an open burner set (part # CBB) of 4. White and stainless units are generally in stock, but there may be a 2 to 4 week lead time. Biscuit and black units will have the longest lead times. Call for your freight costs and availability on these nice ranges!
